

Norcoat

Corrosion Protection
Solutions

On & Off-Site Coatings

We can offer solutions for sandblasting and coatings for both on and off-site painting projects. Our teams are geared to provide quality finishes within your specification. Our access solutions provide safe and reliable solutions, the sky really is the limit! Our teams are set up with trained personnel and overseen by certified coating inspectors, providing quality as a guarantee.

QUALITY

Our capacity to follow through on technical specifications are unmatched.

TRAINING

Norcoat's staff are considered experts in their field, as they are trained professionals.

FOCUSSED

In the end, it's about the finish, we follow through by beginning with the end in mind.

Corrosion and Lining Protection

With teams that have completed over 50 bulk storage projects across Africa, our specialised coatings and linings division can reduce down time and provide guaranteed solutions in multiple environments and various substances. Norcoat has preferred status with trusted coating manufacturers, which offer asset owners accountable project guarantees. Our management team are set up to focus on project quality and working within our customer's schedules.

Tailored Coating Solutions

Every project is unique. Norcoat approaches projects with a solution based mind set. Working with our clients to ensure that their needs and timelines are realised for project completion. Working hand in hand with paint manufacturers enables us to offer tailored coating solutions to fit our customer's budget without compromising on quality and guarantees.

CONSULT

Our team of experts can provide technical reports and services to ensure project warranties are in place.

COST

Detailed quotes provide accurate costing. We work within our customer's budget.

COMPLETE

Norcoat's teams focus on project completion without compromising quality and safety.

Fireproofing

Intumescent and Fireproofing coatings are being prioritised all across the world. Our teams have been trained to apply these specialised coatings according to specification to provide accurate fire protection in times of need. Our equipment is able to apply these coatings with excellent finishes that compliment architectural design and aesthetic finishes.
